

Missoula Fire Sciences Laboratory

50th Anniversary

"Feast of Fire Science"

Saturday, September 18th,
10:00am—3:00pm

- How does Smokey know today's fire danger?
- How do we find fires after a lightning storm, and how do we know when they're likely to spread?
- How do we learn to protect homes from forest fires?
- Do fires *really* create a "moonscape" on the land?

For fifty years, scientists at the Missoula Fire Lab have helped answer these questions and many others. Join us on Sept. 18 to learn more about fire science, past and future, in presentations for all ages, using a wide variety of learning styles.

Teachers can receive up to 5 Montana O.P.I. credits.
